Atlas status snapshot

Date: 2026-08-20
Author: Project status automation
Project: Atlas
Status: stale summary requires verification

Status: pilot complete. Success metric: reduce onboarding time by 30%, from 10 to 7 minutes. Owner: Priya Shah. Measurement owner: Alex Chen.

This page copied the success metric from the February design. It has not been updated with measured pilot values. For actual results, use the August 14 Atlas pilot measurement readout. A more recent document date on this page does not make its copied target an observed result.
